

Who are we?

Adapy Inc. is a company that is dedicated to improving mobility for disabled people by using smart technology. With its patented innovation, Adapy enables disabled individuals to automate the process of preparing their vehicles for driving by simply tapping a few buttons on their smartphones.

What we offer?

We believe we have the solution and the platform to automate everything adaptive! The key to this is our mobile app and our patented hardware which allows the protocols necessary for both analog and digital communication of the adaptive equipment. We take age-old adaptive equipment and with a simple connection to our Smart Hub, bring it into the next generation of smart devices, providing not only mobile controls but full smart automation.

Smart Mobility

Add Smart Technology to your adaptive equipment using the **Adapy Mobile App & Smart Hub!** Create scenes, manage controls and more...

01. Smart Mobility

Simple to install, yet powerful enough to manage all your adaptive equipment from your smartphone. Connect your adaptive equipment to the Adapy Smart Mobility System to control your lifts, cranes, toppers, transfer seats, and more!

02. Technology

Access our library of videos that provide a brief overview of the technology behind Adapy! The videos are less than one minute each, and provide a wealth of information to help you understand the depth of technology that makes Adapy work

03. Safety Benefits

Adapy enables users to prepare their vehicles in advance from a climate-controlled location, avoiding harsh weather conditions. Reducing the risks associated with managing temperature dysregulation.

04. See it in Action

Watch this video and see first hand how the Adapy Smart Mobility System transforms the experience of preparing a vehicle for entry or exit.
